EPGP-EG 2013

EXECUTIVE POST GRADUATE PROGRAMME IN E-GOVERNANCE

Director's Message

Dear Recruiter,

I am pleased to introduce the first batch (2013-14) of one-year full time Executive Post-Graduate Programme (EPGP) in E-Governance at the Indian Institute of Management, Indore. This programme is a strategic response by IIM Indore to meet the talent and real need in this emerging area of administration/management.

EPGP-EG is an intense year long programme that equips participants with the necessary skills in understanding the nature of governance, delivery mechanism, consulting in government and project implementation and execution. This programme is offered with active support of Department of Electronics and Information Technology (DeitY) and logistics support of National Institute of Smart Governance (NISG), Hyderabad.

The programme has attracted 37 participants of which nearly 50% are from Government sector and the remaining are talented young men and women who qualified to be admitted to this programme.

The broad design of the programme includes overall exposure of management more specific reference to governance and administration, adequate coverage on technology trends and its implications to E-Governance projects including project management and execution, and focus on self development. The unique feature of the programme is an internship in appropriate area of e-governance.

The programme curriculum is rigorous, detailed and responsive to the changing expectations in this domain. It provides for a holistic view of business, administration and governance by including subjects like behavioural science, change management, public polices and process re-engineering.

I am confident that you would find the talent from the programme, relevant, useful and worthwhile for appropriate professional engagement.

N. Ravichandran
Director, IIM Indore

MESSAGE

Chairperson Message

Dear Recruiter,

I am pleased to introduce the first batch of Executive Post-Graduate Programme in E-Governance (EPGP-EG) at the Indian Institute of Management, Indore. EPGP-EG is an effort to bridge the growing gap between demand of skilled and relevant manpower in e-governance domain and their availability.

IIM Indore conducts the program in consultation with DeitY, Govt. of India, and NISG. It is an intensive one-year residential programme designed to inculcate skills in management, governance, and IT enabled administration. The participants are chosen through a rigorous admissions process. This year we have 37 participants from which ~50% are self-sponsored. All of them have prior work experience and they come from various academic as well as work back ground. I am sure you will find our participants' profiles interesting and heterogeneous.

The participants go through three trimesters of intensive course work (in-campus module) and an internship program in an e-governance related project. While the in-campus module provides them exposure to management techniques, governance issues, technology enabled administration, and self-development techniques, the internship module enables them to work on field on a real life project. The program curriculum is rigours, extensive, and inclusive. It has been prepared in consultation with domain experts from academia as well as industry.

I am confident that you will find the participants of the program to be useful, well prepared, hardworking, and with relevant skill sets. I am confident that you will find them suitable for appropriate professional engagement.

Saroj Kumar Pani
Chairperson, EPGP-EG Program

NISG Message

Dear Recruiter,

As per the National e-Governance Plan (NeGP), the government of India is taking up various initiatives that is hand in hand with the mission of NeGP "Make all Government services accessible to the COMMON MAN IN HIS LOCALITY, through Common Service Delivery Outlets and ensure EFFICIENCY TRANSPARENCY & RELIABILITY of such services at AFFORDABLE COSTS to realise the BASIC NEEDS of the common man".

The Department of Electronics and Information Technology (DeitY), Government of India and the National Institute for Smart Government (NISG) advocate the capacity building programmes across the nation. There is an intense requirement of professionals who can execute and implement e-governance projects. The central and state government bodies as well as public and private sector companies are in the need of trained manpower in e-governance area for faster, efficient and transparent execution of e-governance and related projects.

Supported by the National Institute of Smart Government (NISG) and Department of Electronics and Information Technology (DeitY), Government of India, IIM Indore has launched the first batch of Executive Post Graduate Programme in E-Governance (EPGP- EG). IIM Indore intends to create a pool of skilled professionals in e-governance domain, through an intense one year long program, who can be instrumental in ensuring good governance in the country either through government initiatives or through private participations.
My best wishes to all the participants of the first EPGP-EG batch to lead the transformation in governance across the nation.

Mr. Sanjiv Mital
CEO, NISG

MESSAGE

About IIM Indore

The essence of management, IIM I believes, lies in managing one's own ambitions and forging ahead consciously.

Established in 1996, Indian Institute of Management Indore is the sixth in the prestigious IIM family of management schools. The institute was chosen to be set up in Indore to give an impetus to management education in central India and has ever since been acting as the pioneer in the field of management, interfacing with the industry, government sectors and PSUs.

Situated atop a scenic hillock, the beautiful 193 acre campus provides an ideal backdrop for some of the brightest minds in the country to work their best to become the best they can be. To back this up, IIM Indore has a solid infrastructure ranging from a very beautiful campus and hostels to a strong IT backbone and the latest in teaching aids. The geographical proximity to the fastest growing industrial belt in India and the presence of Special Economic Zones around Indore provide the right environment for both giving hands-on experience to the students and in enabling the industry to make use of the wealth of management expertise available in the institute.

IIM Indore's achievements in such a short span of time can be attributed to its innovative spirit, its will to excel, and, to a great extent, to the relationship it has developed with the Indore community.

Course Design

The design of curriculum is an important aspect of ensuring relevant and updated content delivery to the participants. To ensure that the program helps the participants in conceiving, planning, implementing, and evaluating e-governance projects in both Government as well as private sectors, the course content focuses on three aspects: (a) domain knowledge of related and relevant fields (b) hands on project experience and (c) interaction with experts and field visits. The course design therefore is a judicious mix of management, technical, and governance concepts complemented with a significant internship module. While Terms I and II cover basic and advanced level courses in management, technology, administration, and governance, Term III comprises of elective courses that participants can choose from a portfolio of courses. These elective courses are offered in view of the participants' needs and the industry feedback collected apriori.
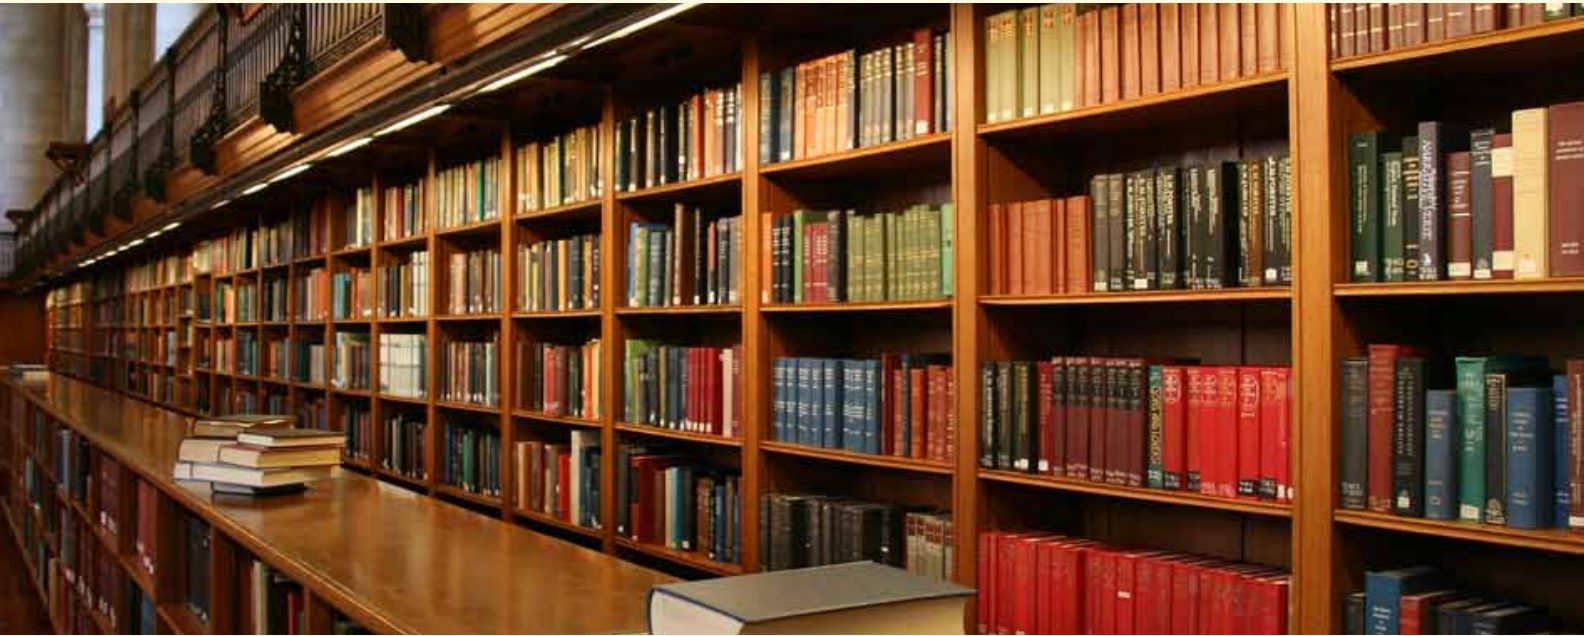

In a nutshell, the programme comprises of four phases: Foundation courses in management and e-governance (two terms), Specialized courses (one term), Internship (20 weeks) and Finishing School (1 week).

CORE SUBJECTS

- Finance
- Data analysis
- Information systems for Organization performance
- Organizational Behavior
- Function and system of government organization
- Introduction to e-governance concepts

- Public policy technology and law
- Business Communication
- IT networks
- E-Governance Concepts
- Government Process Re engineering
- Public Private Partnership
- Change Management and Capacity Building

- Procurement for e-governance Projects
- Emerging Technologies
- IT Service Management
- Software Engineering
- Macro Economic Scenario
- Marketing Concepts
- Research for Management Decision (workshop)

ELECTIVE SUBJECTS

- Consulting of e-governance projects
- Cloud computing
- Social Inclusion for development
- M-Governance
- Identity management

- Software project management
- E-procurement and competitive tendering
- Effective talent acquisition
- Cyber security and E-governance

- Customer relationship management
- Research for management decision
- Project management

About EPGP-EG

Ensuring efficient and effective governance is one of the key ingredients for socio-economic development. Nevertheless, economies of the world as well as organizations responsible for governance have more often than not struggled to ensure a smooth governance mechanism that is both efficient and effective. In particular, developing nations like ours have found it difficult to ensure governance reach to all sections and strata of society. However, the advent of technology has provided us another opportunity to overcome this shortcoming. Technology enabled governance has its own advantages and prime among them are its ability to ensure wide reach, transparency, and cost effective administration. Because of these qualities e-governance is considered to be the next big thing in governance with huge potential to contribute to the development of our nation.

The Executive Post Graduate Programme in E-Governance (EPGP- EG) of IIM Indore intends to create a pool of skilled professionals in e-governance domain who can be instrumental in ensuring good governance in the country either through government initiatives or through private participations. EPGP-EG is an effort to bridge the growing gap between demand of skilled and relevant manpower and their availability. It is an intensive one-year residential programme designed to inculcate skills in management, governance, and IT enabled administration. Supported by the National Institute of Smart Government (NISG) and Department of Information Technology (DIT), Government of India, the programme is expected to build manpower that can take leadership role in private and government organizations in conceptualizing, designing, and implementing e-governance projects.

FACULTY FEEDBACK

It was my pleasure to interact with a vibrant group of professionals coming from Government and private to be a part of the e-Governance movement. The individuals have a passion to contribute and that is why they seem to be spending their wonderful one year of life at IIM Indore. I can confidently say the group is very much interested and capable to learn and contribute towards their share in e-Governance where ever they are in Government or private sector.

I wish each participant the best in their endeavor.

Best Wishes

PIYUSH GUPTA
Associate Vice President
Capacity Building & Knowledge Mgmt.
NISG

"I have been associated with e Goveranance training for the last 4 years, training various levels of officers at both Central and State Govt's across the Country and abroad While that's one part of the story, the second part is facilitating the One year course at IIM-Indore. I found that students of 2013-14 batch are far better than most of the people I have trained, and are young and very quick at grasping the concept. I really enjoyed felicitating GPR course to them. I feel they would do well in which ever organization they join. I wish them all the best"

Regards

WG CDR A. K. SRINIVAS (RETD)
Programme Management Specialist
ICIS project, WRD, Govt. of Maharashtra

I consider it my good fortune to teach the course Public Policy, Technology & Law (PPTL) in the EPGP-EG 2013. Students are from diverse background - professionally & educationally but have one common thread, i.e., to learn more about e-Governance. Presently, they are being groomed to shoulder major responsibilities in e-Governance ecosystem and I am hopeful that they will deliver. India's e-Governance movement is in safe hands!

Regards

VAKUL SHARMA

Senior Advocate, Supreme Court

The phrase "e-Governance" raises hopes of genetically transformed, equitably distributed and unapologetically inclusive governance experience. Though this is a tall order, there is every reason to be optimistic.

A course such as the EPGP-EG conceived as a pioneering collaborative effort between the Government, industry and the academia - intended to enlarge the pool of well informed e-Gov domain experts - adds to the optimism. The 2013 batch of EPGP-EG which is able to rise up to the complex demands of the course and is able to demonstrate, at every opportunity, a seriousness of thought and a sophistication of analytical ability only further reinforces the optimism.

HARISH P. IYER

I had the opportunity to teach the course "Procurement of e-Governance Projects" (PEP) to the Executive Post Graduate Program - e-Governance (EPEG - EG) batch 2013 - 14. The PEP course covered a broad range of subjects related to procurement including Detailed Project Report, Request for Proposal, Service Level Agreement (SLA) and Contract Management. The students were required to perform the following exercises during the course: prepare Vision for e-Governance project, review a Request for Proposal (RFP), answer a teaching case study on Service Level Agreement, make a technical presentation on an e-Governance related subject of their choice and respond to a 25 question Quiz. The Quiz summarized all the key components taught in the course.

The participants in the course applied themselves thoroughly, worked as a unit and submitted their assignments on time and were inquisitive and easy to interact with.
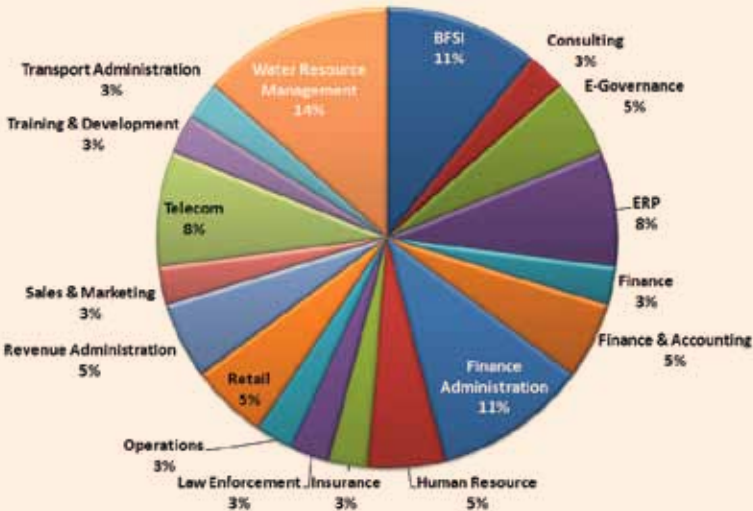

The EPEG - EG program is quite rigorous and wide range of e-Governance related subjects are taught in the course. I strongly recommend hiring of participants from this batch for any e-Governance related opportunity your agency might have.

I wish all of the EPEG - EG 2013-14 Batch the Very Best of Luck

RECRUITMENT PROCESS

Pre-Placement Talk

Pre-Placement Talk (PPT) is an ideal platform for interaction between the organization and the students. The recruters share their organisation's vision, corporate culture, work environment and opportunities available at middle and senior management level. This is followed by Q&A session where the studnets interact with the recruters and gain more insight about the organisation. The pre placement discussion can also be conducted through Video conferencing or through Webinar.

Application

The interested students apply to the organization through the business school's placement office. As a part of application, the students submit their detailed resume for the perusal of the organization.

Internship-cum-Placement Interviews

The recuiters interview the short listed candidates individually. The interview can also be conducted throuth video conferencing. The Internship-cum-Placement interview gives the organization and the student an excellent avenue to interact with each other to understand the role in detail.

Offers and Acceptance

Once the final interview round is concluded, the company can make an offer to the candidate. The offer should include customary details such as job role, compensation, location, and other relevant terms and conditions requred by the candidate to make his/her decision.

Internship-cum-Placement process starts from 8th July 2013
